

DEATH IN DIRTY WATER.

DURING the month of September the drinking water, especially of cities, is apt to be polluted.

To supply water to a large number of people, rivers and lakes must necessarily be drawn upon.

These places become more or less stagnant during September. Hence the water is impure.

The result is a prevalence of Typhoid fever and bowel diseases.

The natural and surest remedy is to change from polluted to pure drinking water.

This cannot always be done, however. Many people are wholly dependent upon such drinking water as the city may furnish.

Their systems are therefore contaminated with disease germs. Some of the cases so contaminated fall away prey to disease. Such people are those who happen to be in a weakened condition, or who are suffering from slight catarrhal conditions of the mucous membrane of the bowels.

Therefore it follows that in cases where the use of contaminated water is unavoidable, the next best thing is to put the system in such position as to resist the action of disease germs.

A multitude of people have come to rely upon Peruna to do this very thing. Peruna produces clean, healthy mucous membranes. These protect the internal organs from the encroachments of disease.

Peruna produces a regular vigorous circulation of the blood. This gives vitality to withstand the depressing influences of September weather.

In this way the system is fortified against the inevitable season of dry weather, low reservoirs and stagnant water.

—Silas Vint, Portland, Ore., writes:—

"My boy (Edna), 15 months old, was sick with inflammation of the bowels for over a month.

"I tried a good many medicines but he seemed to get from bad to worse, until I tried Peruna, and all signs of his recovery.

"At that time I had begun to write to you about his case. I followed your special treatment to the letter, and it acted wonderfully and quickly.

"In three days we had the pleasure of seeing him smile for the first time in a month. Peruna is our favorite medicine now."

Rivals Missing Naval Chemist

**TRAVELED 41 DAYS ON
MILE OVER MOUNTAINS**

WASHINGTON, Sept. 18.—John Barrett, American minister to Colombia, has sent a dispatch to the state department announcing his arrival in that capital, after forty-one days and 1,000 mile travel a sea and land.

Mr. Barrios says he regards the region traversed by the new highway the best undeveloped opportunity of all South America.
